WORK EXPERIENCE

TESDA CAR REGIONAL OFFICE Baguio City, Benguet
Web Developer Intern June 2026 – August 2026

- Developed a web portal for the Unified TVET Program Registration and Accreditation System (UTPRAS) using Vue, Node.js, and PostgreSQL.
- Designed and implemented a Google Sheets-based tracking system to manage initial UTPRAS data and program registrations.

PROJECTS

VERILOCAL 2025
Lead Developer

- Developed a blockchain-powered product verification web application for local artisan in Baguio City using React, Node.js, and MySQL.
- Built to bring greater transparency to product origins and assist in verifying handmade local items.

UTPRAS CAR PORTAL 2026
Lead Developer

- Developed a custom web application to streamline UTPRAS operations and program accreditation workflows for the Cordillera Administrative Region (CAR) office using Vue, Node.js, PostgreSQL
- Designed a scalable system architecture primed for deployment across 1 regional and 6 provincial offices in the Cordillera Administrative Region.

RECOM 2026
Full Stack Developer

- Developed a web-based product discovery engine with AI integration for online shoppers using Vue, Node.js and Supabase.
- Designed to help online shoppers find relevant items quickly through intelligent, AI-driven recommendations tailored to individual preferences.
